

## Whanganui Camera Club Creative DPI Competition

Title	Feedback	Award
<b>B Grade Set Subject</b>	BS	
Abstract Angle	Excellent image. Very dynamic and full of visual energy. I love the pattern. Well done!	Hon
Abstract croc	A very interesting concept. I feel that the main subject it is a bit lost in all the elements that you include in your frame. I would simplified the image by cropping it. (see attached)	Mer
All in a spin	I love sense of movement. This give me an impression of a spinning propeller. Nice effect!	Mer
Contoured profusion	I really like the effect you have achieved here. Lots of visual movement and energy. I feel this need some cropping (see attached) to bring more balance to the image.	Highly Commended
Demon drink	There is definitely something demonic in this image. The colour and the post-processing effect work pretty well together. Unfortunately I can see any element that would suggest a drink for me.	Merit
Generations	Lovely scene, interesting composition, a nice story. I feel that the horizon lines makes the image a bit too placid. If you could position yourself when taking the image and introduce some diagonal lines, this will give the image a bit more energy. (see attached)	Highly Commended
Metallic Ropes	I love the converging lines. They create a lot of depth in the image. I would crop this image to simplified it and removed unnecessary elements.	Highly Commended
Ototoka Fire	I love the colour contrast here. I have an impression of a volcanic eruption. I would add a bit more space at the top. I feel this creates more balanced composition (see attached) Nicely done!	Highly Commended
Pine cone	Interesting post-processing effect. I really like the texture. I would present this image in a square format for a more balanced composition. (see attached)	Merit
Rainbow Zip	I love the juxtaposition here. Fun and colourful. Clever concept and execution.	Hon
Safari Reflection	Love the idea. This could be interpreted in so many different ways. Very well done!	Hon
Smash Palace Takeways	Interesting concept. Unfortunately I feel your technique didn't quite worked for me. The text looks too different to the rest of the car. Also the top left corner is too overpowering. (see attached)	Merit
Through the window	I love this image!. It feels like a tribute to this lady. Very poignant and beautiful. I feel you don't really need the space on the left hand side. (see attached)	Hon
White Chair Ototoka Beach	I like the juxtaposition here. We would not expect to see a chair on the beach. The position of the chair creates visual tension and creates an interesting story as it raises a lot of questions. Nice work!	Highly Commended

Wings	I like the shapes and colour combination here. Vibrant and fun abstract! Nice work	Hon
<b>A Grade Open</b>	AO	
Captain to Shore	I like a sense of scale here. This creates a nice parable about human condition. I would crop it into a square composition to simplified the image. (see attached)	Highly Commended
Couple of Brollies	This is fun and exciting. I love it! Lovely figurative expression!	Hon
Napier Moment	I like the graphical impact of lines and shapes here. I feel cropping off the sky gives this image more visual impact (see attached)	Merit
<b>A Grade Set Subject</b>	AS	
Bannockburn 1	I love the abstract aspect of this image. I would crop it into a square composition. This not only creates better composition but it also makes it even more abstract. (see attached)	Highly Commended
Bannockburn 2	I like the colour reflection in the water and the sense of movement captured by slow shutter speed. These two leaves makes a nice focal point. I would crop it for greater visual impact. (see attached)	Highly Commended
billboard	I love the contrast between black and white treatment and a colour accent. Interesting and visually strong image. I would crop it from the sides for a greater impact. (see attached)	Highly Commended
Bottle	Visually interesting. I love the colour here and shapes. Great sense of liquid motion. I feel cropping helps to bring more balanced composition. (see attached)	Highly Commended
Changing hues	I like the autumn colours and the watercolor like feel to the image. I'm not sure why you have a frame on the left hand side? Just crop it off (see attached)	Highly Commended
City reflections	Very interesting shapes. Dynamic. I would rotated this image 90 deg. It feels better and stronger. (see attached)	Highly Commended
CROSS STREET	Interesting treatment. I really like the mood here. I would crop ed it to remove unnecessary and distracting elements from the edges of the frame. (see attached)	Highly Commended
Day at the beach	Really nice light which creates summery mood. For me the shutter speed is a bit too slow as it blurs the figures nearly completely. I feel the image would have more impact with a slightly faster shutter speed.	Merit
Deadheads	I like the treatment of this image. I feels the portrait composition would be better for the subject matter. I would deficiently crop it (see attached)	Highly Commended
Final approach	Interesting shapes, patterns and texture. For me this is about strange energy and unknown power which will teleport this plane into another dimension. Nice work!	Hon
Foam Portraits	Lovely texture. I can see some kind of creature created by the foam. Visually interesting and dynamic.	Highly Commended
