

Champion PI - Adrian Barrett

Number	Title	Feedback	Result
	AO		
	AO A Painted Tulip	A Technically well executed image with good use of depth of field and colour	
	AO A Tramping Discovery, Waitaanga	an Image with great use of light and tonal quality pulling the viewer into the main focal point. In my opinion I would have loved to have seen the image cropped much tighter to produce a really great image. <i>(By Placing the figure about 1/3 into the right hand side of the image cropping from the <u>base</u> of the right hand bent tree limb. making the top of the image around where the foliage almost touch from both sides</i> I feel quite passionate about this image believing it has the makings to be a real winner	
	AO Alex	a very strong and direct portrait, well lit and well executed. I would have liked to see a little more told about the subject.	
	AO Amsterdam harbour scene	a reasonably well executed architectural image, however I do find the boat on the right hand side a minor distraction.	
	AO Australian Eastern Water Dragon	knowing how quick these reptiles can move I certainly think you nailed this image , pin sharp and well executed with great depth of field.	
	AO Awaiting Resurrection (St Mary's New Plymouth)	A very good architectural image, with every attention given to detail and lighting.	
	AO Bagpipers	an interesting take on Bagpipers, very original, colourful and well shot.	
	AO Champion Workout	overall a good image with great sense of movement, good placement of subject conveying total freedom.	
	AO Diwali Festival	good composition, good use of colour, I would have liked to have seen a little movement to convey the dance.	
	AO Dragonfly duplication	An extremely hard composition to attain with a split focal point, good focus on detail.	

	AO Exit social media	A thought provoking image , well executed with excellent composition.I believe this to be an image well thought out	Runner Up
	AO Family Feud	A well observed moment with good composition and great colour harmony. (<i>my personal comment</i>) I would advise the author to rethink the title as this puts the image into negativity and I don't believe it deserves this	Runner Up
	AO feeling the love	An emotional image , I would have liked to see a little more emotion in the childrens faces. Well done on your choice of media, cutting away colour influence always seems to put more emphasis on the subject matter.	
	AO Fledgling Sparrow	Good Sharp simple image as it should be, well captured.	
	AO I dreamed of a garden	I would certainly believe you have achieved a dream like quality to this image	
	AO I performed for Royalty in Westminster	A well constructed image displaying a moment in time with the appropriate emotion	
	AO Last train,Huiroa	Good composition medium, I would like to see more of the story	
	AO Male blackbird feeding on Cotoneaster berries	A well captured moment. good long lens use with the right amount of depth of field and good composition	
	AO Melancholy Strings	Good use of a solarisation media which fits the intent of the image perfectly, good composition and placement of main subject	Commended
	AO Myth - A healthy suntan	This image in my opinion is all about good composition and the use of angles and strait lines capped by good colour, in my opinon the image would be an excellent advirtising shot.	Commended

	AO Of course the little guys were consulted	I see this image as a great environmental statement although I have the feeling that the background is competing with the foreground	
	AO Pretty Peacock	Great use of saturated colour, good composition and placement of subject coupled with being well focused through the entire image	
	AO Red and Yellow	A Well observed Moment, Good graphic qualities and image placement.	
	AO The Fear of Public Speaking	Subliminal Qualities well crafted	
	AO The Gap	An interesting twist in colour, good composition, good light separation and timing	
	AO Tomtit	An excellent example of wildlife photography, well lit, pin sharp image and tastefully vignettted.	Commended
	AO waiting for lunch	Very much an illustrative image, good lighting, optimum sharpness and well lit. the background adds tonally to the spiders environment.	
	AO Walking on the waterfront	This is a wonderfull image depicting the best in motion, colour, lighting and testure. The image certainly represents everthing it is .	Winner
	BO		
	BO Forest Baby	Certainly an attention grabber, well lit but requiring a little more attention to detail and colour	
	BO Forest Floor	The Delicate new beginnings of this fern is well captured with excellent colour and exposure handling	Runner Up

BO Fungi - Mycena Ura at Blue Lake (Tikitapu) Rotorua	Well seen and shot, capturing the delicacy of the subject with good use of depth of field and subtle colour	
BO Gannets at Farewell Spit	This image captures the feel of birds on the wing, technically excellent, but wanting to see more.	
BO Golden Stairway	Strong composition with a good lead into the image coupled with the overall warmth to the scene	
BO Great Grandma	A cute record image, well lit. I would like to have seen a little more connection between the subjects IE: heads in a closer relationship. This is not an easy subject matter and requires patience.	
BO Grey Heron	A technically good image of a Heron fishing with the bonus of a reflection, in my opinion the only distraction is the piece of driftwood in the lower right corner of the image.	
BO Kereru	A good technically OK shot I would have liked to seen the background out of focus to place more emphasis on the subject	
BO Lemon	Technically a good image, but in my opinion the overall composition is compromised by the cropping of the lower petal.	
BO Looking Down on the Apostles	A well constructed image with a good lead in foreground I would like to see a little more definition in the cliffs, rocks and sky	
BO Mantis	A great little pin sharp close up of this Mantis. Good choice of background . Shame about the short feeler close to camera	
BO Mt Aspiring National Park	A well seen pastoral Landscape, I would like to have seen the image format a little wider to relate a feeling of grandeur, coupled with a little post production on the mountains to achieve more detail.	
BO The Rewa Rewa Bridge	A different take on photographing a mountain landscape. Great that you kept all the detail in the highlights of the foreground structure, my only criticism would be that I keep wanting to see the mountain in the middle of structure	Runner Up
BO Through the Rain on my Car's Windscreen	An interesting and different approach to photographing rain on the windscreen, Colours work well, good composition, light and selective focus. A good example of thinking outside of the square.	Winner
